Structure Measures via Quarterly Survey: MOMD

Full Survey Available Here

<https://www.whamglobal.org/data-collection#PA-PQC-Site-Surveys>

Quarterly Process Measures: MOMD

with validated depression screening during pregnancy

<https://www.whamglobal.org/data-collection#PA-PQC-Measurement-Specifications>

deliveries during measurement period

with follow-up care within 30 days

with positive depression screen during pregnancy

All Quarterly

with standardized depression during 84 day period after delivery

All by Race/Ethnicity Annually

with deliveries 84 days prior to start and end of measurement period

with follow-up care within 30 days

with deliveries 84 days prior to start/end of period with positive depression screen during the 84 day period after delivery

PA PQC Moving on Maternal Depression

January through March 2022

88% of MOMD healthcare teams used validated tools for universal depression screening.

Follow-up Processes:

Reducing Racial Disparities:

How did you form your MOMD team and engage inpatient/outpatient and community partners?

How and when is the depression screen administered during the prenatal and postpartum periods?

What is your follow-up protocol for positive screens?

As part of this workflow, what do you document in the EHR?

How do you pull this data for the MOMD process measures? How do you stratify this measure by race/ethnicity?

For the PA PQC Healthcare Teams that recently joined MOMD, what questions do you have to inform your QI initiatives?

Upcoming Sessions

1. June 30 Learning Session at Best Western Premier, 800 East Park Drive Harrisburg, PA 17111
2. October 6 MOMD Virtual Meeting 11:00 a.m. to 12:00 p.m.

<https://www.whamglobal.org/member-content/register-for-sessions>

Meeting materials will be posted here <https://www.whamglobal.org/member-content/materials-from-sessions/past-key-intervention-webinars/momd-virtual-meetings>
