Q1: The length of the sub-award application is limited to 7 pages. Does this include all of the attachments that would act as "proof" of milestone completion, or are separate attachments not included in this page count? Or should these details be written out in the application and those specific documents would be submitted if the site is chosen?

A1: Separate attachments are not included in the page count and are not necessary, because the "Evidence to Verify Completion of the Milestone" (see Table 1 in the Application) is not part of the application to apply for the sub-awards. These additional documents would be submitted later if the site is selected. For the purposes of this application, just respond to the five questions in the application.

Q2: Can you explain what evidence is appropriate for, "written analysis describing the data collections forms that either exist or do not exist for the OUD and NAS quality measures"?

A2: Please see the answer to question 1 above, since *"written analysis describing the data collections forms that either exist or do not exist for the OUD and NAS quality measures"* is part of the "Evidence to Verify Completion of the Milestone…" in Table 1 in the Application. This analysis would be submitted after the PA PQC hospital applies and is selected to participate in the Sub-Awards. This analysis could include a table that identifies the data source and the exact location of the necessary data (i.e., the data field) for each measure.

Q3: Can a PA PQC hospital be awarded two sub-awards, meaning one for NAS and one for OUD?

A3: A single PA PQC hospital is only eligible for up to one sub-award. However, in the Sub-Award application, the PA PQC hospital can elect to explain their quality improvement projects for both NAS and OUD.
